

## **Stakeholder Analysis**

- **Job Seekers:** The primary stakeholders are individuals seeking employment who will directly benefit from the Powered Resume Builder. Job seekers will gain from the personalized resume-building experience, which tailors content to highlight their qualifications effectively. This tool aims to enhance their ability to present themselves in a competitive job market, ultimately improving their chances of securing interviews and job offers.
- **Recruiters and Hiring Managers:** These stakeholders are essential for providing feedback on the quality and effectiveness of the resumes generated by the tool. Their insights will help ensure that the Powered Resume Builder meets the industry standards that recruiters expect, making it easier for them to find qualified candidates. Additionally, their input can guide the tool's development to focus on the key qualifications they look for in candidates.
- **Career Coaches and Advisors:** Professionals who support job seekers in improving their application materials. They will benefit from the Powered Resume Builder as a resource to recommend to their clients. Their expertise will help shape the tool's features to align with best practices in resume writing and job application strategies.

- **Educational Institutions:** Colleges and universities can serve as stakeholders by incorporating the Powered Resume Builder into their career services. This integration would provide students with a valuable resource for developing effective resumes, thereby enhancing their employability. The institutions can also gather feedback from students to improve the tool continuously.
- **Human Resources Departments:** HR professionals can utilize the Powered Resume Builder as part of their recruitment processes. By aligning the tool's outputs with specific job roles within their organizations, HR departments can ensure candidates present themselves accurately and effectively, leading to a more efficient hiring process.
- **Technical Team:** The developers, designers, and data scientists responsible for building and maintaining the Powered Resume Builder. Their expertise will be crucial for implementing the AI features that personalize resumes based on job descriptions and user input. Collaboration with stakeholders will ensure that the technical solution meets user needs effectively.
- **Investors and Business Partners:** Individuals or organizations that provide funding or strategic partnerships for the project. They are interested in the market potential and financial viability of the Powered Resume Builder, which influences the project's direction and resources allocated.

- **Market Research Analysts:** Analysts who study job market trends and user needs, providing valuable insights that can inform the features and marketing strategies of the Powered Resume Builder. Their research will help ensure that the tool remains relevant and effective in addressing the needs of job seekers.
